Notes and Data Definitions:

- All tables exclude canceled classes. Both active enrollable and non-enrollable classes, including credit and noncredit classes, are included in the data.
- When calculating retention and success rates, the instructor's summary is not an average of all the class-level rates. Instead, it reflects/calculates the combined results of all grades from all classes taught by that instructor, so each grade is weighted equally. Note that success rates may be skewed when noncredit classes or grades are included in the calculation.

Grade	Definition	Retained Grades	Success Grades
