PROGRAM OVERVIEW

In this program, students garner safety, electrical, and mechanical competencies required for the maintenance and repair of rail vehicles in these core areas: couplers, truck and axle, propulsion and dynamic braking, auxiliary inverters and batteries, friction brakes, HVAC, current collection and distribution, monitoring and diagnosing, car body, doors, communications systems, and car-borne cab signal control systems.

The Rail Vehicle Maintenance Degree and Certificate are designed to prepare students for employment in the Rail industry.

Career opportunities for students completing this program of study include, but are not limited to:

- Locomotive Engineers
- Rail Car Repairers
- Rail-Track Laying and Maintenance Equipment Operators

By fulfilling the program requirements, students will have the necessary knowledge to develop the safe skills to perform preventive maintenance and inspections on light rail, passenger and freight rail cars; utilize basic computer skills to review, create, and update electronic work orders; and diagnose and repair stationary and rotary mechanical, electronic, low and high voltage electrical components and their issues.

The coursework in these programs meet the requirements for Snap-On 604 Meter Certification, Bendix Air Brake Certification, Single Car Testing per Association of American Railroads AAR S-486 Certification, and Mobil Air Conditioning Society (MACS) 608 and 609 Certification.

NOTE: Students are required to provide educational supplies, basic hand tools, Transportation Technology uniform, text book and personal protective equipment (PPE). Students are also required to complete the Snap-On 604 Meter and Bendix Air Brake certifications.

PROGRAM LEARNING OUTCOMES (PLOs)

Upon completion of the **Degree/Certificate** program, students are able to:

- Identify and explain the operation of rail vehicles and systems along with related subsystems and related industry standards.
- Diagnose and repair rail vehicles and systems using various manufacturer diagnostic software, tools, and shop equipment in accordance with industry standards.
